

TEXTILE DECORATION TECHNOLOGIES

- since 1932 -

STAHL'S. INVENTOR OF CUTTABLE HEAT TRANSFER MATERIALS.

Textile printing as we know it today would not be possible without cuttable heat-transfer material, which has only existed since 1988. In this year STAHL'S revolutionized the textile printing industry by inventing CAD-CUT vinyls (computer-aided design). CAD-CUT® remains a registered trademark of STAHL'S until this day, but the concept has been established worldwide. Any graphic can now be custom-cut on demand using a computer and a plotter cutter.

HIGHEST QUALITY. ALWAYS INNOVATIVE.

The cuttable CAD-CUT® as well as the printable CAD-COLOR® materials are produced in STAHL'S' own factories around the globe. This way we can always ensure the highest quality for our materials. They are constantly being advanced in our own research facilities in order to fit the requirements of the textile industry. Our CAD-CUT® and CAD-COLOR® materials are always made to suit the textile's characteristics.
