## Fluorescent Cast Vinyl

Fluorescent vinyl films are extremely bright, high gloss films designed for the use in the automotive, RV, marine, architectural and general signage markets.

### PHYSICAL DESCRIPTION:

#### FACE FILM:

2 Mil pigmented, high gloss, premium cast vinyl film.

#### ADHESIVE:

1 Mil high performance, white, solvent based acrylic, pressure sensitive.

#### RELEASE LINER:

78 lb silicone coated bleached kraft.

#### OUTDOOR DURABILITY:

All fluorescent pigments will typically fade when exposed to sunlight. These films, as such, are recommended for short term applications only when used outdoor for less than one year.

#### APPLICATION TEMPERATURE:

50°F.

#### PEEL ADHESIVE VALUES:

30 min.      72 hrs.  
180° Peel Values    3.5#/in.    4.5#/in.

#### ELONGATION:

100% minimum.

#### SHELF LIFE:

One year stored at temperature under 70°F and 50% relative humidity.

#### NOTE:

Always pretest your specific substrate prior to actual application to determine product performance on that substrate.
